

ARYAMAAN UPADHYAY

+91 70114 34159 | the.aryamaan.upadhyay@gmail.com | Bengaluru, India

EDUCATION

Manipal Institute of Technology, Bengaluru-Bengaluru, India

B.Tech in Computer Science & Engineering — First Year

- CBSE Class X: 92% | CBSE Class XII: 80%
- MVPP (formerly JSTSE), Grade IX — All-India Rank 217; awarded scholarship by the Government of Delhi
- BRICS Mathematics Challenge, Grade X — Full score (100%)

PROJECTS

- **CivicLens** — AI-powered civic issue reporting platform (*React, Firebase, Gemini Vision API, Google Cloud Functions*). Built at the Vibe2Ship Hackathon (Coding Ninjas × Google for Developers); automatically classifies and routes citizen-reported issues to the relevant government departments.
- **FinCalc** — Investment calculator (*Python, Streamlit*) for SIP, lump sum, and FD-vs-Mutual Fund comparisons, built on real financial mathematics.

EXPERIENCE

AI Model Evaluation Fellow, Handshake AI — *Jul 2026 – Present (Remote)*

- Author complex, multi-hop natural-language search prompts across 15+ subject domains (Business, Legal, Finance, History, Science & Technology, Sports, and others), engineered to surface genuine reasoning and factual-accuracy failures in frontier LLMs, including GPT-5.5 Pro Thinking Extended
- Conduct rigorous primary-source verification using SEC filings, government records, and archival documents to construct single, unambiguous, fully verifiable ground-truth answers
- Document structured step-by-step reasoning chains and detailed failure analyses that feed into model-evaluation datasets used by leading AI research labs

Research Intern, Department of Management Studies (DMS), IIT Delhi — *May 2026 – Jul 2026*

- Completed a research study titled "*Deepfakes in India: Institutional Vulnerability, Governance Barriers, and an Interpretive Structural Model of Critical Success Factors*"
- Reviewed the regulatory and institutional landscape of synthetic media in India; designed and administered a structured expert-elicitation survey
- Applied Interpretive Structural Modelling (ISM) and MICMAC analysis to build a hierarchical model of critical success factors for national deepfake governance
- Completed the draft of a full research paper based on the study's findings

PROGRAMS, CERTIFICATIONS & HACKATHONS

- **CVIT Summer School on AI 2026, IIIT Hyderabad** — Selected as one of a limited number of undergraduate participants nationwide, in first year of study.
- **AI Program, 1Stop (in collaboration with IIT Kharagpur's Kshitij)** — Dec 2025–Jan 2026.
- **Industrial Program on Artificial Intelligence, Personify** — Dec 2025–Jan 2026; completed project on Text Classification with TensorFlow.
- **Business Analytics Program, Finlatics** — Dec 2025–Jul 2026; applied the MECE framework, MS Excel, and Power BI to solve business cases in profitability, tourism, and pricing strategy, including forecasting, scenario/what-if analysis, predictive analytics & regression models, and interactive Power BI dashboards.
- **India AI Impact Buildathon, HCL GUVI** — Completed the buildathon on applied AI problem-solving.
- **Vibe2Ship Hackathon, Coding Ninjas × Google for Developers** — Built CivicLens, an AI-powered solution, using Google AI Studio as the core development tool.
- **Copado DevOps AI Certification**
- **Claude Code 101 Certification**
- **Google Gemini Certified Student**

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- **President**, The Literature Society, MIT Bengaluru
- **Student Ambassador for Global Engagement (SAGE)**, Department of Internationalisation, MIT Bengaluru
- **Working Committee Member**, Office of Alumni Relations, MIT Bengaluru
- **Working Committee Member**, MAHE Innovation Centre, MAHE Bengaluru (Entrepreneurship Cell)
- **Editor**, Newsletter of Mimansa — the Debate, Journalism & Public Speaking Club, MIT Bengaluru
- **Organising Committee Member** — Falak (MIT Bengaluru Cultural Fest), Rubaru (MAHE Bengaluru Fest), and Techsolstice (MIT Bengaluru Technical Fest)

TECHNICAL SKILLS

- **Languages:** Python, Java, C
- **Frameworks & Tools:** React, Streamlit, Firebase, Google Cloud Functions, Gemini Vision API, Power BI
- **Currently Learning:** SQL, C++
